

Youth Imagine a Resilient Future:

Imagine, innovate, implement and share at the Youth Resilience Expo

Hampton Roads is experiencing challenges from the rising seas and flooding, and **we need YOUTH to create innovative solutions as we learn to adapt to the water and become resilient.** The Elizabeth River Project seeks students to investigate the issues, imagine, implement and showcase results at the first Youth Resilience Expo at Nauticus, Saturday, April 6, 2019, 10-1pm.

SPECIAL OPPORTUNITY

Did your students implement a project this school year that addresses reducing flooding or your carbon footprint? Examples include: rain gardens, rain barrels, watershed map, energy audits, lights out campaigns, solar, wind projects, etc.

Elizabeth River Project invites Norfolk, Portsmouth, Chesapeake, and Virginia Beach schools to send 5 students and a teacher to showcase their Environmental Project at our first Youth Resilience Expo, Saturday, April 6, 2019, 10-1pm.

Elizabeth River Project staff are available to meet with you to discuss during your resource hour and limited funding is available to help with supplies.

Simply: You would create a display to showcase your project. You would then choose 5 students and a teacher to attend the Expo.

Your school will be recognized as a River Resilient School and may win an award for your project.

All ages can participate and each student can invite 2 adults or guardians to also attend. Admission is free. Parking is available at the Plume Street Garage, \$5.
